

The later period leaves the open slots empty

This contract follows the research ledger. One later period stores the measured rotation pass. Bliss hosted acceptance and Economics Phase 9 stay on their own paths. Phase 29 still records that its own pass has no later period configured.

A later period stores the measured open slots and the creator decision. It does not fill a theoretical slot. No revenue row is on file. This is not a census. Economics remains the only price authority. Green does not send. Delivery remains NOT_SENT.

What was proved

READING	RESULT
Stored advertisers	4. Harbor Audio Labs, Sunrise Wellness Co., TEST Dental Manila, and TEST Restaurant Santo Domingo. Stored slots 8.
later-period-1	Theoretical 6. Placed 4. Open 2. Stored slots 8. Creator Approved. Census No. Slots changed No. Delivery NOT_SENT.
Same period again	That later period is already stored. The open slots were not filled. Delivery remains NOT_SENT.
later-period-withheld	Creator Withheld. Open still 2. The approved row stayed Approved. Advertisers stayed 4. Slots stayed 8.
Revenue	No revenue row is on file. None was invented. Economics remains the only price authority.

The operations page is /operations#/period. The contract is docs/architecture/contracts/ROTATION-PERIOD-CONTRACT.md. The four names are the advertisers already stored. They are not a census.

Verification

```
dotnet test Bliss.Tests/Bliss.Tests.csproj --verbosity minimal
```

413 passed, 0 failed, 0 skipped. The new proofs are RotationPeriodTests and RotationPeriodApiTests.

The browser recording shows the four stored advertisers, the approved later period, the refusal to store that key again, and the withheld row later-period-withheld. Nothing was sent.

What this does not authorize

Filling a theoretical slot with an advertiser that is not already stored.

A marketplace census, or a revenue amount.

Rewriting the Phase 29 notice that its own pass has no later period configured.

A live send or a new subscription.

Hosted Bliss acceptance or Economics Phase 9.

The ranked priority list in the current-state report ends with this period. Those two acceptance paths stay on their own roads.
