

One marketplace reading leaves revenue unrecorded

This contract follows the coverage week. One marketplace reading stores the measured advertiser count, the measured creator count, and the stored slot count. A revenue amount is not on file. This is not a census. The balance page is unchanged. Green does not send. Delivery remains NOT_SENT.

The stored reading key is metrics-reading-1. Advertisers 4. Creators 3. Slots 8. Revenue rows 0. Stored advertiser pressure is ahead of stored creator pressure. Census is No. Revenue recorded is No. Slots changed is No. Delivery remains NOT_SENT.

What was proved

READING	RESULT
Stored rows	Harbor Audio Labs, Sunrise Wellness Co., TEST Dental Manila, and TEST Restaurant Santo Domingo. Creators Test Creator, Test Creator Brazil, and Unknown Demographics Creator. Slots 8.
metrics-reading-1	Advertisers 4. Creators 3. Slots 8. Revenue rows 0. No revenue row is on file. None was invented. Delivery NOT_SENT.
Same reading again	That marketplace reading is already stored. No revenue row was added. Delivery remains NOT_SENT. The counts stayed 4, 3, and 8.
Record a revenue amount	A revenue amount is not on file. None was invented. Economics remains the only price authority.

The balance page still says this sentence. Revenue is not recorded. Inventory is not recorded. Those sentences were left in place.

The operations page is /operations#/metrics. The contract is docs/architecture/contracts/MARKETPLACE-METRICS-CONTRACT.md.

Verification

dotnet test Bliss.Tests/Bliss.Tests.csproj --verbosity minimal

435 passed, 0 failed, 0 skipped. The new proofs are MarketplaceMetricsTests and MarketplaceMetricsApiTests.

The browser recording shows the four advertisers, the three creators, the eight slots, the stored reading metrics-reading-1, the refusal to store that key again, and the refusal to record a revenue amount. Nothing was sent.

What this does not authorize

A marketplace census, a revenue amount, or a filled theoretical slot.

Copying an Economics amount onto this reading. Automatic repricing. A settlement.

Rewriting the balance page. Changing a stored slot.

A live send, a crawler, or a new subscription.

Economics remains the only price authority. Delivery remains NOT_SENT.
