

ALPHA CREATIVE ACADEMY

Phase 1 of 4 - Charter and prototype library

Date: 2026-10-05

Delivery: NOT_SENT

Model calls: 0

Purpose

Preserve the teaching method for the future Fishing Fleet and Wedding Planner creative infrastructure. The prototype teaches the quality. The recipe teaches the craft. Creative DNA customizes the advertiser. The production worker creates the work. The instructor judges the work. Only approved work moves forward.

The cake principle

An excellent finished cake is shown together with the recipe and the quality standard. The next cake keeps that craftsmanship and changes the flavor for the customer. The academy does the same for advertisements. One quality floor. Many brands.

What this phase stores

The supplied Maison Fleur Patisserie advertisement is the quality teacher. Its role is REFERENCE. It is not an advertiser to clone. The name Maison Fleur, the slogan "A sweeter journey awaits you.", and the phrase "French artistry" stay with the teacher.

The image used on the operations page is the owner-supplied reference. This run did not generate a replacement and did not call a vision model.

What this phase does not claim

Hosted acceptance is not complete. Campaign ready is refused. Green does not send. A production model was not called. Families other than patisserie have no prototype on file, and none was invented.

Done when

The contract is written, the prototype is visible on the Creative Academy page, this report exists, and the phase recording shows the teacher.
