Review required

- Human review should assess commercial color, contrast, highlights, shadows, lighting, realism, depth, separation, typography, hierarchy, polish, screen impact, and Premium Dominant Presence.
- Human review should verify Panama-market authenticity and that the invented person, products, setting, composition, and identity do not copy an Academy reference.
- The bottom banner is a purpose-built 1280x180 layout. Human review must still accept the adapted layout, commercial quality, and Panama-market authenticity before any regression baseline.
- The HV-4 review sheet is prepared. Every GQD-1 grade is UNCLASSIFIED. No copy check, market judgment, or layout acceptance was recorded.
